Obituary

The funeral of the late Thomas Alder took place on Sunday afternoon, from the family residence. The capacious rooms were taxed to the uttermost, many standing in the hallway. The service was conducted by Mr. and Mrs. Bye, former residents of the district, who in their addresses referred to the pleasant fellowship which they had enjoyed with the deceased young man during past years, and testifying to his spiritual development during that time. Several others present bore testimony to the sterling character of the late "Tommy" Alder as he was affectionately known to his many friends and neighbors, and spoke of his qualities as a son and brother in the home.

Favorite hymns and a solo were included in the service after which about sixty cars followed the mortal remains to the cemetery, where Mr. Bye officiated at the graveside.

Many beautiful flowers adorned the casket, testifying in a small measure to the esteem in which Tom was held in the community.

The pallbearers were schoolmates of the deceased, among whom Tom was always a popular leader in healthy sport. Viz: Theodore Holm, Amos McLeod, Harold Alcock, Walter Raeburn, Fred Puzey and Wilfred Warren.

The funeral arrangements were in the hands of Shaver Ltd., Calgary.

Lake McGregor Hockey

Team Visits Champion

On Wednesday afternoon Archie Ruggles brought over a husky hockey team from Lake McGregor to try conclusions with the Champion Juniors. This was the second game played on the local rink this season, but it is hoped there will be many others before the end of winter. The game started out at a good pace and the first goal was scored by the "Fish" Ruggles a few minutes later. Champion scored next making a tie and soon after the visitors led again with the score at 2-1. After this the locals piled up the score to 8, the visitors failing to register again.

The game was witnessed by a good crowd of fans. The only regrettable feature of this friendly contest was that two of the visiting team received nasty cuts from a raising puck, the goal tender, Steves being forced to retire, referee Fred Watts taking his place and referee R. D. Farries officiating alone for the rest of the game. Champion Juniors line-up: Forwards—P. Bastin, A. Luff, D. Campbell, R. McCullough, D. Luff, L. Frait, Defense—D. Stephenson, and W. Anderson. Goal—H. Taylor. Referees—F. Watts and R. D. Farries.

Barons Hockey Team

Loses to Champion

The Champion Junior hockey team met the Barons team on local ice Saturday afternoon. The ice was very soft, making play difficult. It was a one-sided game from start to finish as the score indicates. Champion 6, Barons 1. Champion team will return this game on Saturday, February 4.

Local & General

Mrs. P. Dawson and son Earl are Calgary visitors this week.

Mrs. J. Vanbesien left for Vancouver on Friday.

Heavy Waxed Paper, 100ft rolls 35c. At the Drug Store.

Mrs. John Cain is a Calgary visitor.

B. M. Roberts was a Champion visitor over the week end.

Harry Smith spent several days in Calgary last week.

Mrs. E. Lonheim is a Calgary visitor this week.

Mrs. Collins was a Lethbridge visitor recently.

VALENTINES, at the Drug Store.

Father Green and Father McAdam of Calgary were Champion visitors Tuesday.

F. Smith has been confined to his bed this week, suffering with the flu.

Mrs. Roy Hammon and son Glen were Calgary visitors this week.

Mr. and Mrs. H. C. Jopling have taken up residence in the rooms above the Chronicle office.

Mrs. Little of Stavelly is visiting at the home of Mr. and Mrs. B. Hummel.

Mr. and Mrs. F. Watts spent the week end visiting in Strathmore.

Mrs. Larkins is visiting at the home of Mr. and Mrs. Collison of High River.

STRAYED to the premises of O. Sietto, red sow weighing about 300 lbs.

Mr. Farries resumed his teaching duties Friday of last week, after an illness of one week.

Mr. and Mrs. L. J. Adams and A. A. Adams left Monday to spend the winter in Long Beach, California.

Miss Marguerite Vanbesien returned to Champion Wednesday after a two month visit in Vancouver.

Miss Sarah Fleming had the misfortune to break her arm while cranking her car Tuesday after school.

Rev. Dawson motored to Calgary this week to bring Mrs. Dawson and Earl back to Champion.

Eddie Ohlbeiser was a visitor at the home of Mr. and Mrs. John Olson of Stavelly for a few days.

K. R. McLean, R.O. of McLean & Anderson, Sight Specialist of 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday, Feb. 24th at the Drug Store.

C. Starr Royally Farewelled

The members of the Badminton club gathered in the Community Hall on Wednesday night to do honor to Charlie Starr, prior to his departure for Calgary on Monday. The Milo club was invited over for the occasion, and the series of games which were played added greatly to the pleasure of the evening.

In the men's double the play was in favor of Champion at all times, total score Champion 74, Milo 44. In the ladies doubles Milo defeated Champion 69-61. In the mixed doubles Champion again were victorious, score 84-70. The total was, Champion 210, Milo 102.

After the lunch short speeches were given by the chairman, G. M. Campbell, Mrs. Nelson, Messrs. Spafford, Cully, Wood, representing Milo, all expressing appreciation of the evening and regretting Mr. Starr's departure. At this point vice president, Miss Melita Fath, made the presentation of a Rolls razor to Mr. Starr. The presentation and the acknowledgment being the feature of the evening.

Mr. Campbell expressed regret at losing Mr. Starr, stating that he would be greatly missed in sport and social circles. Mr. Starr was a baseball enthusiast, well known in tennis and a decided favorite in badminton. His transfer to Calumton, his removal a well known figure from town to the regret of many associates. All will join in extending their very best wishes to Mr. Starr in his new home.

Art. Woodhall has been confined to his bed this week due to an attack of the flu.

An Inelastic Law

One Relating To Jury Duty Could Be Improved On

A short time ago in Ontario a man called for jury said it would throw 22 men dependent upon him temporarily out of employment. The judge refused to excuse him. It is a common sense that at this time of all times nothing should be done to hamper employment. It is a common sense that there are thousands of men capable of discharging the duty of juror in a completely satisfactory manner, whereas there are relatively few men whose presence is necessary in order to keep 22 men in employment. A system which is not sufficiently elastic to permit of making exceptions which intelligence suggests is not good enough. The judge's decision emphasizes the necessity to make the law applicable to conditions as they are at the moment—Calgary Alberta.

For Farm Relief

United States Senator Has New Plan To Aid Adjustment

A possibly far-reaching new element was introduced into the United States congressional farm relief drama as Senator Brookhart, of Iowa, declared in favor of an emergency plan which he said William C. McAdoo, California's senator-elect, was considering.

He described the McAdoo plan as calling for agricultural price-fixing by federal law and for governmental control of the surplus. Because of a belief the scheme would be vetoed by President Hoover, Brookhart said it is not planned to bring it forward for action until the next congress meets in the spring.

New Treatment

United States Investigator Reports New Remedy For Pneumonia

Dr. Edwin E. Zeigler, of the United States veterans' administration, reported discovery of new treatment for pneumonia.

The treatment, a substance called "pneumochin," has been found capable of building up immunity in rabbits against "type one" pneumonia, so they are able to resist attacks of this disease which ordinarily would prove fatal, says Dr. Zeigler, in the administration's medical bulletin.

Pneumochin is produced by dissolving pen moccoc—cholera germs—in sodium tartrate phosphate, derived from bile.

Holidays For This Year

Most Of Them Fall On Saturday Or Monday

Holiday occur in 1933 as follows: Good Friday, April 14; Easter Monday, April 17, which is only a bank holiday; Victoria Day, Wednesday, May 24; Saturday, June 3, King's birthday, which is not generally observed in Canada as yet; Saturday, July 1, Dominion Day; Labor Day, Monday, September 4; Remembrance Day, Monday, November 13; Christmas Day, Monday, December 25. Then there will be civic holiday and Thanksgiving Day to be declared later. It will be noted that most of the holidays occur either on Saturday or Monday this year, which gives long week-ends for gambling.

Victim Of Swindle

Boys Former German Kaiser Bought Bogus Statue

When former Kaiser Wilhelm paid 3,000,000 marks for a statue of the mythological queen of the underworld, says a noted Italian professor of ancient art, he became the victim of a colossal swindle.

The statue, which depicts Persephone, a major Roman goddess and consort of Pluto, and which now is in a Berlin museum, is said by Professor Edoardo Galli not to be genuine. Wilhelm bought the work before the war in the belief that it was the handwork of an artist living in the fifth century before Christ.

An Unfinished Story

In 1900 Clarence Herbert New started writing a serial story for a magazine called "Five Lances In Diplomacy." It has run continuously nearly every month since then, exceeding 3,000,000 words in length, but it will never be finished. New died suddenly January 15, at the age of 71.

Eight Pacific type locomotives in England have travelled a total of 4,250,615 miles.

Marie Antoinette was imprisoned for more than a year before her execution.

W. N. U. 1979

A Queer Hobby

Cleveland Pastor Has About 18,000 Pictures Of Locomotives

Ever since the Rev. James H. Dean, pastor of the Brooklyn United Presbyterian Church in Cleveland, Ohio, watched Pennsylvania Railroad trains thunder past his house every day when he was a little boy in Xenia, Ohio, locomotives have held a strong fascination for him.

Nothing particularly remarkable about that, is there? Who has not felt a thrill at sight of a great snorting "iron horse" galloping with rhythmic clackety-clack over the narrow bands of steel rails?

But the Rev. Mr. Dean turned his admiration into a hobby. He began back in 1908. And any thought that this is a hobby that would not last is promptly dispelled by a glance at his big filing cabinet which, he says, contains between 15,000 and 18,000 locomotive pictures. All are as carefully arranged as a botanist might classify floral specimens. Rev. Mr. Dean took most of them himself. Others he acquired through trades with other collectors.

There are about 200 "seriously inclined men" who have been taking locomotive pictures for years, he says. They are organized into the Railway and Locomotive Historical Society. He has corresponded and traded pictures with some of the members for years and never met them. A few have visited him here, or he has gone to see them and their collections.

Almost all the members of the society follow professions other than railroad though it includes one railroad president. The collections have practically no monetary value, the pastor says, but they are lots of fun. All the collectors fall to find much interest in the electric locomotive, Rev. Mr. Dean said. They feel it is not as picturesque or as romantic as the steam locomotive belching smoke and fire.

And the motor bus and airplane? Oh, well, locomotive fans just can't help being "agin" anything which threatens seriously to cut in on the railroads.

Payable In New York

Canada's Borrowings Payable In U.S. Funds Total \$3,328,000,000

Canada's repudiation of American exchange on debenture payments in New York, January 1, entailing a loss of \$300,000 to United States interests, has directed attention to the amount of Canada's debts payable in New York, which up to the year was the chief financing center for the Dominion's loans, federal, provincial, municipal or corporate. The funded debt of all classes of Canadian borrowings from the federal government down to corporations is estimated at \$7,662,000,000, of which 42.8 per cent, or \$3,280,000,000, is payable in United States funds, 47.4 per cent, in Canadian funds, and 9.8 per cent, in sterling.—St. Thomas Times-Journal.

Brazil Burning Coffee

Finds It Cheaper Than Coal For Making Gas

The use of low-grade coffee for making gas and by-products is proving a commercial success at the gas works at Victoria, in southern Brazil. Coffee in Brazil is just now cheaper than coal, for 3,000,000 ounces of it have been burned in the open air or dumped at sea in recent months. The discovery that burning coffee can be used for gas making, therefore, brings a clear gain. The coffee as used in making gas was ground and made into bricks with a tar binding. After the experiments got under way, the tar used was a by-product of the coffee still.

To Discuss War Debts

Talk With Britain Planned After U.S. President Inauguration

President Herbert Hoover and President-elect Franklin Roosevelt, in a White House conference, agreed upon a discussion of war debts with representatives of Great Britain to take place early in March after the change of administration. In a statement issued at the White House it was said the official talks with Great Britain would include also the economic problems of the world and "ways and means for improving the world situation."

Fifteen thousand employees of a British railway are attending classes and lectures at the company's expense this winter.

Air accidents among the British Air Force number three times those of all British civil planes.

The Washington, D.C. zoo has a new collection of 50 rare loads.

CANADIAN SOCIETY ORGANIZED TO FOSTER ARTS AND LETTERS

A new organization to be known as the Canadian Society for Literature and the Arts, and designed to exercise a cultural and educational influence has just been organized. Its object is to promote a greater knowledge of literature, history and the arts, with particular emphasis upon Canadian effort in these directions. Above are some of the leaders in this new society. The Patron is His Honor Dr. H. A. Bruce (4), Lieutenant-Governor of Ontario. President, Professor Pelham Edgar (2), of Victoria College, Toronto; Vice-President and Chairman of the Council, John M. Elson (1), well known author, journalist and lecturer. Second Vice-President, Dr. E. J. Pratt (3), of Victoria College, well known Canadian poet. Organizing Director, Miss Ethel W. Rogers (5), Toronto. Photo of Professor Edgar by Violet Keene of Eaton's Studio, Toronto.

Popular Notion Wrong

Blood-Transfusion Benefits and Does Not Weaken Donor

The popular notion that blood-transfusion weakens and injures the donor of the blood was exploded at London by the revelations of P. L. Oliver, honorary secretary of the Blood Transfusion Service of the British Red Cross.

This service consists of about 1,250 men and women, ranging in age from 18 to 60, who are attending London hospitals regularly to give blood to perfect strangers. On an average 500 donors per day are supplied, but more than a score have been sent on a single day.

Oliver says that it is extremely rare for a donor not to be back at his or her work within an hour after the transfusion.

"So far as athletes are concerned," he stated, "some young men particularly are keen for transfusions on Fridays or Saturdays, as it induces such a feeling of fitness for football, hockey or running."

Miss Amy Gentry, who recently won the Women's Amateur Rowing championship of England is a regular donor, her last transfusion having taken place ten days before competition.

Drum Not For Sale

Curio dealers in London and New York are reported to have offered up to \$20,000 for the huge drum which the Prince of Wales triumphed on his recent visit to Northern Ireland. The Prince got the drum stuck as a memento, but the drum is not for sale.

"Dear Mr. Editor—Will you please read the enclosed short story carefully and return it to me with your candid criticism as soon as possible, as I have other irons in the fire."

"Dear Sir—Remove irons and insert short story."

Glasgow, Scotland, has a war on dog racing.

Monsoon Is Important

Regulates Amount Of Rain Which Falls In India

The monsoon, which sweeps across the Indian Ocean during the season from the end of May to September, is one of the most important factors in Indian prosperity.

Nearly the whole amount of rain which falls in India during the year is in the monsoon, and if the downpour fails Indian peasants and farmers have their crops ruined. Anxious they wait every year for the heavy clouds to burst, when the wind has rolled them across the Arabian Sea to India.

In the early days of navigation the Arabs and the Eastern voyagers who first sailed the Indian Ocean, depended on the monsoon, and the early European trading companies regulated their voyages to the East according to the monsoons.

Today sailors vary their course during the monsoon, which is really a reversal of the normal winds over the ocean.

In the Arabian Sea the normal wind is the northeast trade wind, but actually it blows only in the cool season. When the sun is overhead in the north of India, a depression develops in the northwest. As a result, the southeast trade wind blows over the Equator and then circles round the centre of depression or low pressure, reaching India as a southwest wind.

Famous Brothers

The late Lawson Oslor, who died recently in London, was the last of the famous Canadian generation of Oslor brothers—Sir William Oslor, the greatest modern authority on medicine; B. B. Oslor, famous criminal lawyer; Sir Edmund Oslor, manager; Hon. Featherston Oslor, the Judge; and the noted Edward Oslor, being the others.

A survey of 10,000 rural homes in 33 states show that 87 per cent of the women on farms never have vacations.

History Marked By Bells

London's Great Ones Died In Famous Whitechapel Foundry

Every glaucous event in the magnificent pageant of English history has been marked by the solemn chiming of some great bell. The birth of kings and their coronations, martial funerals, and the execution of traitors—all have been marked by the sound of some bell made in the famous Whitechapel Foundry.

From there came the great cathedral bells of England—Canterbury, Winchester, Durham, Wells, Southwark, and St. Paul's. There was made the famous "Great Tom" of Lincoln, weighing 22,000 lbs.

In the fifteenth century courtyard here bells are lying in disuse, bells which must have charmed the ears of Queen Elizabeth.

In the great foundry, where a craft is practiced that has been handed down from generation to generation and which requires the greatest skill, Big Ben's chimers were cast, and so were Bow Bells.

Might Become New Party

People Must Be Careful How They Handle Technology

Technology is an ugly word, but its exponents have the beautiful idea that an efficient, modern, scientific world should act that way. Unfortunately, the technocrats do not show how it can be served during alterations.

The danger is that some day technology will become a party and nominate people for things and act silly. Worse still, it might be what the next great war is to make the world safe for—The New Yorker.

Sacrifice To Naval Treaty

Japan Has Turned Big Battle Cruiser Into Training Ship

The battle cruiser "Hiei," Japan's sacrifice to the 1930 London naval treaty, short of her big guns, has become an innocuous training ship at the gunnery school Yokosuka, Japan. The "Hiei" belonged to a class of four 26,330-ton ships which critics rated the most formidable group afloat. The 1930 pact, which doomed five of Great Britain's capital ships and three of America's, stipulated that the "Hiei" should be stripped of offensive power.

Scheme Was Successful

Low-Fare Excursions Net \$500,000 For Canada's Railways

If all operations of Canadian railroads proved as successful as the low-fare excursion experiment of the past year, Canada would have no railway problem. A. A. Gardiner, assistant general passenger traffic manager, C.N.R., stated in an address at Montreal. These special excursions had netted the Canadian Pacific and Canadian National Railways approximately \$500,000, about half of this sum going to each, he said.

The night hawk migrates the farthest distance of all the land birds, from Yukon to Argentina, 7,000 miles away.

Depression And Family Life

Unemployed Husbands Should Not Spend Too Much Time At Home

Unemployed husbands who are warned not to stay home too much and their wives are cautioned not to punish their anxious menfolk in a report on "What the Depression Is Doing to Family Life," issued by the United States Committee for Mental Hygiene.

When the breadwinner loses his job, the report says, "there is often seen a tendency in the other members of the family to throw blame on the father for the dilemmas in which they find themselves. He usually reacts in one of several ways: Sometimes he gives in and adopts a hanging air."

"In this case he often develops numerous symptoms of apparent physical disease, headache, general weakness, vague pains here and there for which, however, the most careful medical examination fails to disclose any adequate physical cause. However, this man does not deliberately and intentionally manufacture his symptoms of illness."

"Perhaps," adds the report, "father should not spend so much time at home. There is sometimes a marked increase in hostility toward the father when, because of unemployment, he begins to function more actively in the domestic scene. His presence at unusual hours tends to upset domestic routine and to throw many of the usual daytime customs of the family out of gear."

On the other hand, the report finds evidence that there is less frequency at present because unemployed fathers are spending more time with their children at home."

Must Pay The Fiddler

View Of United States Paper On Wheat Reference

The British Customs have ruled that Canadian wheat shipped through American ports cannot be given imperial preference unless some scheme for a "through bill of lading" can be worked out, which nobody seems to think likely. Consequently, Canadian wheat, which has moved through Baltimore, one year to the tune of 15,000,000 bushels, will avoid our elevators, Stewart Henderson, who is traffic manager of the Baltimore Chamber of Commerce, concludes from this that "two can play at the same game in this tariff business."

This is a wise conclusion, and one too commonly ignored by our politicians, who appear to think that America can pay tariffs indiscriminately, ignore the facts of war debts and pursue a reckless economic policy generally with no fear of reprisal. Well, Ottawa is one fruit of the United States of America, and the grain elevators of Baltimore are among those who must pay the fiddler for playing the game of economic nationalism.—Baltimore Sun.

Autogiro As Fire Fighter

Tests Show It Well Suited For Forest Patrol

The autogiro aeroplane has found a place in fire patrol of Pacific Northwest.

Tests conducted during the past fire season showed the autogiro well suited for forest patrol purposes because of its ability to hover over the trees, to get in and out of canyons, and land and take off on small fields.

"Planes contracted for forest service use will make flights from Seattle or Wenatchee in Washington. Since 1910 the forest service has used aeroplanes for forest fire scout duty."

Still Proving Useful

Ninety-Two Year Old Grindstone Is Now Curbside

A circular grindstone which once turned out Rhode Island Johnny-cake, has at the age of 92 years become a common curbside.

In 1884 the stone which was being used at the Boyd windmill got broken after 44 years' service. From 1884 until last September the broken parts, placed together, were laid down at the entrance to the mill. Recently when a small party was held out, the stone was donated to the town for use as a curbside.

"Madam, this morning when I bathed I found only a nail-brush in the bathroom. I can't wash my back with a nail-brush."

Landlady—"Well, you've a tongue in your 'ead, 'avent' you?"

Lodger—"Yes, but I'm no swan."

There are approximately 11,000 motor vehicles registered in Syria. Of these 8,157 are passenger cars.

New Motor Fuel

Using Common Charcoal or Coke To Drive Engines

Science is even revolutionizing the fuel we use for locomotion. Mr. N. C. Jones, of London, England, claims to have invented a means of using common charcoal or coke as the basis of a fuel for motor vehicles, which will supply power at a coal equivalent to petrol, at 30 to 40 cents.

The apparatus consists of two units—a gas producer, and a cleaner and filter. In operation, the passage of air and water vapor through an incandescent mass of charcoal creates a gas which, when passed into the cylinder and mixed with air, forms an explosive mixture. The apparatus, it is said, can be attached to any commercial vehicle, and also to stationary heavy oil plants.

A company is now launching this process on a commercial basis in Britain, and it is stated that, during the course of a year, they are hoping to produce a more compact apparatus for the use of private cars.

Adjust Freight Rates

Domestic Rates On Feed Grain Westward May Be Reduced

Reports are prevalent that the domestic freight rates on feed grain westward are to be reduced. The decrease will be of benefit to Saskatchewan, Alberta and British Columbia, and to a lesser extent to Manitoba.

Domestic freight rates are higher than export rates. In the schedules under consideration the difference between the two tariffs is likely to be cut from 40 to 50 per cent.

The action under discussion would enable the prairie farmers to find a wider market for their No. 6 grain. The western farmers have a large stock of this feed grain on hand.

Poultry and chicken farmers of British Columbia would get cheaper feed grain as a consequence. A large market exists in the coast province for this commodity.

The situation is under review with indications of an easy decision. The way of reduction of domestic freight rates on feed grain westbound.

THE RHYMING OPTIMIST

By Aline Michellie

HERITAGE

We cannot know them all, These ancestors of ours,

Who left us, through the long, slow years,

Such strangely varied dreams, And lives of wild-fowl dreams,

Another gave a heart that clings To tangle ways and haunts,

One gave me truth and trust, One gave me pride and fire,

The gift of life, and life enough To grasp my heart's desire.

Women with laughing lips And men who fought and dreamed;

To through my veins the changeful tide Of diverse lives has streamed.

And sometimes I must ask, How so strangely run,

How much of this myself is I, How much those other ones.

New Bow For Violin

German Elderly Finds Silver Vires Give Good Tone

For centuries past the violin bow has been made of horsehair. It is perhaps a lucky thing that, just as the horse is disappearing, a German elder has invented a new bow string with silver fibres.

These fibres are of about the same thickness as horsehair, and as they are slightly roughened on the surface they vibrate the string perfectly without the use of resin. The tone, it is claimed, is far better than is given by the ordinary bow. It is not commercially available on this continent as yet.

About \$400,000 worth of gold is produced each year.

Rothsay, Scotland, has officially banned Sunday golf.

"The man still had to be proved that the patrol had been wrecked by his own crazy orders."

(To Be Continued.)

FOR HEAD COLDS

snuff up nose also melt in hot water an inhale vapors

VICKS VAPORUB

OVER 25 MILLION JARS USED YEARLY

Burgoon there at the trading post, shorthanded as we are?"

"To watch after the furs and trade goods."

"That's MacMillan's lookout. I'll have to instruct Pedneault to get Burgoon tomorrow."

"But Miss Joyce expects to return there. She has good reasons. What protection do you intend to give her?"

"If she insists on returning, I don't see any responsibility. This isn't an orphanage; it's a Mounted Police post."

Alain entered that remark in his account against the inspector. Haskell's callous attitude toward a defenseless, girl-stricken girl seemed to him a good index to the man's real manhood.

Still keeping his sword hidden from Haskell, he broached the matter of that patrol to the Inconnu. As he sketched his plan briefly, he saw that Haskell, listening to him coldly, was not even interested. An unpleasant name came over his lips.

"Haskell thought? Didn't the man realize he had made a fatal mistake?"

Alain summed up his plan: "In three days I want to have a patrol lying low on the Inconnu. I'll take Hardwood and Pedneault, and enlist three good 'breeds as constant sentries."

Haskell stepped him. "I'm not interested in your plan, sergeant. You're merely making a long guess about what they'd do. It sounds thin."

"About as thin as my guess that they'd take the north branch into the 'Thal-Azrah'! Alain flung back at him. 'I know this country. Now, get this straight inspector: I'm going to make that trip. I didn't come in here to ask your permission. You've wrecked one patrol. If Superintendent Williamson here about that, you won't have a chance to wreck any more. You'll keep your hands off this Inconnu trip, or Williamson is going to hear of it—quick!"

The threat daunted Haskell not at all. He scarcely seemed to have heard. With that faint sardonic smile on his face, he intoned coldly:

"Besides the finissness of your plan, sergeant, there's another absurdity about it. You just came back from a patrol that started out with every chance in the world of succeeding. You yourself admit you met ten bandits and even had them cornered. But by your weak vacillating flight you allowed them to escape."

"What's that?" Alain cut in. "A weak vacillating flight? . . . Good Lord!" His memory whipped back to Bill and himself bellying up behind the muskrat house, and to Larry Young, coming out against six men on open water.

"You failed durnally," Haskell proceeded, in knife-edge voice. "You probably wanted to fail, so you tried to hang something onto me. Those criminals are clever enough. One of your men was badly shot. After such a performance, don't you think it's far ridiculous of you to stand there and boldly ask me to let you lead a thousand-mile, all-summer patrol with five men? Instead . . . Well, you're in the Mounted long enough to know what the consequences are of a failure like yours."

Alain stood daunt. Haskell was actually blushing that disaster upon him! Did the man still feel that the patrol had been wrecked by his own crazy orders?

"He was in the Candle-Ice Lake country, trying to locate Little Court's hand. He'd feed them all winter, they would him their spring peltry; but they'd sneaked away and taken their peltry to the L. & H. He saw no one; he has no ally."

"That trader would be released," Haskell said flatly. "I'll decide himself to keep him here or send him outside to Edmonton."

Williamson, Dave MacMillan's plight with a cut gurgles, he demanded: "What made you leave Constable

Gas Station For Planes

Filling stations for light aeroplanes have been established near Berlin, Germany. Pilots of sport aircraft can now taxi up to the stations and fill their tanks without going to the trouble of landing at airports. A large funnel is used to make sure that the gas will go where it is needed without spilling.

Several model textile mills will be built by Kwangtung Province of China.

cards, and he was thoroughly frightened.

It would spell ruin to his career if the facts of the patrol became known. The blame of this shameful defeat lay squarely at the door of Baker. Baker surely realized that; Baker surely was going to use that sword against him.

It was war now, open and avowed war between them.

Step by step, logic led him to the one and only recourse he had. If Williamson ever found out he had ordered that patrol split, he was sunk. Therefore Williamson must not find out. There was no way to keep him from knowing the facts.

Haskell tried to still his conscience by thinking that Baker had wanted the patrol to fail. If that was so, then this measure was exactly what the sergeant had coming to him. He ought to be smashed, and smashed hard. . . . You've got to fight fire with fire.

Still in his muddled and torn uniform, Alain came down the slope toward Haskell's cabin, intending to bludgeon some hard and fast terms out of the guilty inspector or shoot a constable over his head to the constable's attendant, Williamson. If Haskell did not give in to his demands, he meant to send a half-breed runner to the Inconnu Signal Corps station at Kamour and flash a message to the division commander that would start an avalanche.

Over at Mrs. Drummond's house where Joyce had come, candles were gleaming in the windows. Across at Father Claverly's tiny hospital, Larry Young was lighting for his Yax. To the slope at barracks Dave MacMillan was locked in the police "butter-tub," charged with being accomplice to robbery.

Joyce had reported secretly: "Alan, I talked with him. He isn't guilty! He never heard a whisper about these bandits, until I told him. He couldn't have deceived me!"

That same impression had been Alan's. "He couldn't have deceived me," Alan thought, as he remembered that pack of furs which hadn't come to light yet and which would explain those damning circumstances.

It was his conviction that Dave MacMillan was not guilty at all.

He meant to put up a fight for Dave. It was easy to resolve that, but the actual job was the hardest thing he had attempted in his whole life. The only way under heaven of clearing Dave was to capture the guilty men and either write a confession out of them or hold out king's evidence.

Which way would they try to escape? They were east when they left the 'Thal-Azrah. They'd go across the Great Barrens to Hudson's Bay and try to pick up passage on a fishing schooner or go east and south toward the Pas in Manitoba. There was only one route leading east out of the 'Thal-Azrah, and they'd have to take it to have an old Timash trade route, the Inconnu River.

Alain meant to lead a patrol to the Inconnu.

As he strode into the cabin, he saw Haskell waiting for him, coolly smoking a cigarette. It seemed to Alain that the man actually did not realize that his ignorance could have wrecked the patrol and that the whole blame and shame of it lay at his door.

When he finished his report, Haskell made no comment. Wondering at his cool air, Alain was silent a few moments. He could not understand the man's nonchalance. This was war between them; each knew it; and yet Haskell showed no fear, no concern, no conciliatory spirit whatsoever.

Keeping back his heavy weapon, Alain took up his defense of Joyce's father.

"About Dave MacMillan. My opinion is he's entirely innocent. There's no call to send him outside to Edmonton. A reasonable court is coming down the Three Rivers in August, and his case can wait for that. He can be kept here, or released on bail. Drummond will put up bail; I'll be personally responsible for him. There's another reason; he's got some good friends among the Dogries; if he's released he'll get by safe and stir them up to help him these bandits."

Haskell interposed. "What was he doing last week? Where was he? Can he put up any ally?"

"He was in the Candle-Ice Lake country, trying to locate Little Court's hand. He'd feed them all winter, they would him their spring peltry; but they'd sneaked away and taken their peltry to the L. & H. He saw no one; he has no ally."

WORLD HAPPENINGS BRIEFLY TOLD

The Earl of Chesterfield, former lord steward of his majesty's household and the 10th earl of that name, is dead in his 70th year.

The monthly average of employment in Canada throughout the year 1932 was 801,256 employees, according to a voluminous report issued by the Dominion Bureau of Statistics.

Department of national defence proposes as a measure of unemployment relief to construct an additional landing field at Camp Borden in the near future.

A new organization to be known as the Canadian Society for Literature and the Arts, was brought into being at a well-attended meeting of active and influential Toronto citizens.

The aggregate value of all field crops in 1932 is estimated at \$415,566,000, as compared with \$423,235,400 in 1931, said a report issued by the Dominion Bureau of Statistics.

Exposés from Alberta at the World Grain Congress in Regina next summer are expected to reach 200 and approximately half that number have already been received.

Ernest William Benson, before his retirement one of the largest lumber exporters in Canada and owner of large timber tracts in the northwestern Quebec and Newfoundland, is dead at Montreal, aged 86.

A non-stop flight from Moscow to Angola, a distance of more than 2,000 miles involving a crossing of the Black Sea, is planned by the Soviet civil aviation society, Osoaviakhim, for 1933.

The American Chamber of Commerce in London, through Francis E. Powell, its president, announced its advocacy of a plan to hold the projected world economic conference at Washington.

Served Queen Alexandra

Late Resident of Calgary Was Once Lady-in-Waiting

Honorable Mabel Vintz-Fitzgerald, former lady-in-waiting to Queen Alexandra, is dead. She was known in Calgary as Mrs. Fitzhugh Rose, proprietor of a small lending library and bookstall to the north.

Brought up in the grandeur of King Edward's Court and guided by her mother's parents, Lord and Lady Cecil Gordon, her life in Alberta was a strong contrast to the brilliant one she once knew.

Following her marriage to George Fitzhugh Rose, she settled with her husband on a ranch at Pine Lake, north of Calgary, 22 years ago, later coming to the city. For a number of years she operated her little library until illness forced her to retire.

An Unusual Record

Sisters in Nebraska Have Lived Together Forty-Eight Years

Two sisters whose combined ages total 187 years live together at Holdrege, Neb. They claim to be one of the oldest sister combinations in the state.

Miss Anna Lehtinen is 97 years old and Mrs. Hanna Luodeval, her sister, is past 90 years of age. The two have lived together during the past 48 years. They do their own house work and care for a large garden and lawn.

Deficits of French railways in the last three years totalled nearly \$360,000,000.

England had less sunshine last year than in any 12 months since 1860.

Picard Foresees Few Hours Journey From America To Europe
Prof. Auguste Picard, engineer of the stratosphere, predicts that travelers in many years hence will cross the Atlantic in "stratospheres" with less risk than in crossing a large modern city in an automobile.

He gave an imaginary description before the National Geographic Society at Washington of a flight in such a machine, several of which he said already were being built in Europe.

"Visualize a tired sonator here in Washington," he said, "sitting at his breakfast table trying to conceive of some new law he can pass, when a friend telephones from Paris asking him to drop in for luncheon six hours later. He pushes away his breakfast and rushes to the stratosphere, and enters a stratosphere."

"The stratosphere is the inevitable super-highway for future international transport."

Of Interest To Poultrymen

Saskatchewan Poultry Division Issues Third Annual Catalogue

The third annual catalogue of Saskatchewan poultry and turkey breeders has recently been issued under the supervision of the poultry division of the provincial livestock branch. The catalogue contains a list of all prominent breeders in Saskatchewan, together with details respecting the products which they have for sale. Articles of interest to poultrymen generally, written by experts in the field, are also included together with a brief summary of the provincial and federal services which are offered for the assistance of the industry.

Winnipeg Newspaper Union
Fast Track
By Ruth Rogers

FRUIT BEANS MANAGE
(Serves 6-8)
1½ cups evaporated milk.
1½ cup sugar.
1½ teaspoon salt.
4 teaspoons cornstarch.
1½ cups orange juice.
1 teaspoon grated orange rind.
Heat milk in double boiler. Mix sugar, salt and cornstarch. Blend with part of orange juice. Add remaining juice to hot milk. Add grated rind. Cook until smooth, stirring frequently. If orange juice curdles milk, beat with whirl type beater. Pour into individual serving dishes and chill. If desired to mold, increase cornstarch 1 tablespoon.

Science Steps Back
Science has stepped back another few hundred years and found the relics of a people who existed 8,000 years ago, not far from where the Persians hundreds of years later reared up the Black marble palaces of their ancient capital, Persepolis, the Paria of the day.

An English scientist says that fortunately for mankind not more than one egg in every 10,000 lives to become a full-sized herring.

Netherland Indian air services are using American pursuit planes.

A SIMPLE DRESS—SO EASY TO WEAR AND SO FASCINATING TO MAKE

Here you have today's model! And isn't it ravishing? A dress in which you will always appear smart. It is no conservative, it can be worn for street, bridge or office. In the original, a purple of a blue shade in deep crepe silk was chosen. The matching bow buttons are its only trim.

If you're thinking of a woolen dress, it's delightfully snug in a soft grey mixture with tubular-bod buttons and leather belt.

Style No. 992 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 16 requires 3½ yards 36-inch. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap copy carefully.

Recipes For This Week

(By Betty Barclay)

COFFEE FRUIT CAKE

1½ cup shortening.
1 cup light brown sugar.
2 eggs.
1½ cup coffee.
1½ cup milk.
3½ cups flour.
3 teaspoons baking powder.
1½ pound raisins.
1½ pound citron.
1 pound figs cut in strips.
Cream shortening, add sugar, egg yolks, coffee and milk. Sift together flour and baking powder and add slowly. Add fruit, which has been slightly floured, and fold in beaten whites of eggs. Bake in greased loaf pan from one hour to one hour and a quarter.

PORTABLE RAIL-VAN

Eliminates Necessity Of Re-Loading Goods For Shipment

A new type of mobile container, named the "rail-van," designed for co-ordination of railroad and truck service in long-distance hauling of household goods and adaptable for carrying general freight, was demonstrated at New York at the Baltimore & Ohio Railroad's tracks.

The rail-van is a detachable truck body mounted on roll-off cars, which can be removed, when fully packed to a capacity of 7,000 pounds, from the truck platform directly to a railroad car.

This new van eliminates the necessity of unpacking the goods from the delivery truck on departure and a partial reloading of the freight from the railroad car to a moving van on arrival. This, it was declared by Henry A. Heimers, president of Rail-Van, Inc., of Chicago, will materially lower the cost of shipping of freight, over distances above 250 miles, and thus will enable the railroads to meet the competition now being offered them by motor buses.

Needy Veteran Settlers

Says Soldier Settlement Policy Has Not Been Changed

The policy of the soldier settlement branch, adopted more than a year ago, to the effect that no settler under the act will be disturbed if he is making a sincere effort to establish himself and is unable to meet payments because of circumstances beyond his control, has not been altered.

This was the statement of department officials whose attention had been drawn to a despatch from Prince Albert, Sask., which stated that the local branch of the Canadian Legion was about to appeal to the Dominion Government on behalf of some needy veteran settlers.

A man with two hearts has been discovered. We wish they could use him in the banking industry.

Slam plans to lend funds to farmers.

+ Do You Know? +

WHAT this gentle eyed beast derives his name from the shape and size of his ears? He is known as the mule deer and he is probably the greatest stilt-legged jumper in the world. He and some ten thousand of his brothers and sisters make their homes in Jasper National Park, Alberta, Canada, the largest national park in the world. The park has an area of more than 4,000 square miles.

Gerald Larkin Says Remove Trade Barriers At Salada Annual Meeting

Newspaper Advertising Still Back-

bone Of Solid Advice

Mr. Gerald Larkin, President of Salada Tea Company, is addressing the Annual Meeting of the staff said: "Business such as this is at the end of a good year are always a source of pleasure to everyone of us. When general conditions are bad, and when even our own business has, in a measure, reflected these conditions, we sometimes find the effort to bear ourselves cheerfully more than a little difficult. Any such feeling must be fought against and defeated by everyone of us. If we are going to make the following year a success, my cheerfulness I do not mean any foolish measure of optimism, although under present conditions I must hardly want any of you against that, but I do mean a reasonable faith in the future based on the past history of this country and of the world."

There is undoubtedly a measure of defeatist propaganda being carried on. I have heard it said, and written the last month or two, that every country in the world, including Canada and the United States, is headed for revolution; that things are getting steadily worse every day. This talk comes, as on one might suppose, from extreme socialists or communists. It is not from people who are still in moderately comfortable circumstances. But who, having enough to do, allow themselves to absorb all the depressing features of a nation's conditions and reach a point where their judgment is entirely clouded. We are all meeting people like this and must do our part to combat their ideas.

I see it, what the world needs is greater mutual understanding between its component parts; greater appreciation of each other's difficulties; less nationalism and more internationalism. It was exactly

SUNDAY SCHOOL LESSON FEBRUARY 5

JESUS CHOOSES THE TWELVE

Golden Text: "I chose you, and appointed you, that ye should go and bear fruit."—John 15:16.
Memory: Mark 3:7-13.
Devotional Reading: Isaiah, 55:1-11.

Explanations and Comments

The Thronging Multitudes, verses 1-12. Although Pharisees and Herodians have Jesus and took courage as to how they could get rid of him, we saw in our lesson last week Jesus' popularity among the people grew by leaps and bounds. Stories of his miraculous cures spread rapidly. Jesus with his disciples withdrew to a quiet place, a miracle-moment, Jesus, intent on being cured by him, saw the thronging multitudes of others. From north, south, east and west they came: from Galilee and Judea, and Idumea, and Perea beyond the Jordan and Tyre and Sidon. In the northwest, Jesus south of Judaea in the Jordan of the Old Testament, the land where Esau and his descendants dwelt.

Jesus took the precaution of directing his disciples to have a small boat in readiness so as to make his escape, if necessary. He was in actual danger, being craved by the importunate crowd. People suffering from plagues tried to touch him, believing that the touch would cure them. See Mark 6:56. The demoniac fell down in homage before him, saying, "Thou art the Son of God," and Jesus charged them not to make him known, for "whenever this time, nor were these the preachers," he thought says. Popular enthusiasm might lead to an outbreak, being dangerous to him cause.

The summary shows us clearly that a new phase in the ministry of Jesus had begun: the synagogue is forsaken and the open places and the synagogues are sought. Jesus, in a word, begins an open ministry. One is reminded of the way in which the great pioneers of the modern evangelic movement were forced out of the churches of their day, and of how in consequence that great open-air crusade was begun which had such far-reaching results in the life of England and America.—Alfred Lord Community.

The Chosen Twelve, verses 13-19. Jesus was spending the night in prayer on the hill-side of Capernaum overlooking the lake (Luke 6:12). From the inner circle of his followers Jesus chose twelve men to be a group of special disciples. The number twelve naturally suggests a correspondence with the twelve tribes of Israel. "It was a subtle way of suggesting to the Jews," a commentator thinks, "that He was founding a new theocracy—the newer and nobler theocracy that was to replace the old." Jesus needed helpers. He needed them for his own sake and for the work he was to do. He called them to be with him, to be his friends, and to be trained by him, to understand him and his message, and to carry on his work after he was gone. He commissioned them to preach, to proclaim the glad news of the Kingdom, and to cast out demons.

Among new inventions is a machine that cures cold hands and feet by friction of a padded, leather-covered drum. The vibration runs through the blood circulation.

those features which won the war. There was no solid advice or suggestion from the Allied and Associated Powers. Unfortunately, immediately after the war, the state-manship concluded a disastrous peace, such as this at the end of a good year are always a source of pleasure to everyone of us. When general conditions are bad, and when even our own business has, in a measure, reflected these conditions, we sometimes find the effort to bear ourselves cheerfully more than a little difficult. Any such feeling must be fought against and defeated by everyone of us. If we are going to make the following year a success, my cheerfulness I do not mean any foolish measure of optimism, although under present conditions I must hardly want any of you against that, but I do mean a reasonable faith in the future based on the past history of this country and of the world."

Cheapest and Best

Advantage Of Newspaper As Advertising Medium Again Stressed

Denton Massey of Toronto has given fresh expression to a truth that is generally known by the advertiser with such things. Newspapers, Mr. Massey tells University of Western Ontario students, are "head and shoulders" above any other advertising medium. Radio advertising is good, Mr. Massey explains, but it is essentially entertainment. On the other hand, the results of newspaper advertising are known. Its appeal does not lie so much in it is seen, and the advertisers know the type of subscribers they reach through the columns of the newspapers.

For one who has observed the slightest thought to a study of advertising comparisons can doubt the correctness of Mr. Massey's statement. There are many forms of advertising, but none can begin to approach that of the newspaper. It reaches the largest audience and at the lowest cost. —Border Cities Star.

May Reduce Shock Deaths

New "Pop" Chemical Helps Patients To Rally Quickly

With cortin, the magical "pop" chemical produced by two glands in the human body, surgeons in the near future may be able to save the lives of most patients who now die from the shock of severe operations or accidents.

Full details of experiments indicating cortin will rally patients from the very threshold of death due to surgical or wound shock is contained in a recent issue of Science.

It is expected surgeons will at once begin using cortin on shocked patients in an effort to corroborate the findings of the Princeton scientists.

Vacations By Lottery

Following the success of the mystery journeys to unannounced destinations, the Austrian State Railways are preparing another feature for the next tourist season. Lotteries will be held, tickets being sold for a small sum. Winners will be given a vacation in some popular Austrian resort.

Less Grain Wasted

Due to improved operating efficiency one amount of grain wasted in transit from Western Canada to Montreal has decreased from an average of 10 bushels to every 100,000 transported. In the few years preceding 1929 to less than four bushels 100,000 transported in 1932, says the national revenue department report.

A strip of "cotton road" laid in South Carolina six years ago, and exposed to equal traffic conditions has required no repair attention and is still in excellent condition.

India rubber is now successfully used as a substitute for putty in the setting of window glass.

PREMIER SAYS RAIL PROBLEM IS SERIOUS ONE

Ottawa, Ont.—The railway problem in Canada is threatening the very economic life of the country, Premier R. B. Bennett told a deputation of railway men here. Like the fabled old man of the sea it was clinging to the back of Canada, slowly throttling life.

No language was too extravagant to describe the seriousness of Canada's railway problem, the Prime Minister said. It had been submitted by the railways that too much emphasis had been placed on the financial end of the problem and not enough on the human.

"But if these enterprises stop altogether there will be no work at all," said Mr. Bennett. "Our effort is to maintain as good a balance as possible between these enterprises. That is our job, our responsibility."

If this country continues as we have done in the past, we cannot continue long. We have only 10,000,000 people, scattered from sea to sea, and we must stop incurring too much responsibility or we cannot pay on the past (responsibilities). And if we cannot pay on our past responsibilities, we cannot borrow money on Canada's economy. Life was at stake, proceeded the Prime Minister, and if we lose our credit, we lose everything.

The Prime Minister mentioned the Canadian National deficit each year, but the deficit in 1932 was \$700,000,000, and this year it looks as if it will be well within it if it is not a "week."

"This country," continued Mr. Bennett, "has only 10,000,000 people, and we find it exceedingly difficult to pay present taxes. We know there is a breaking point, and every day gets us closer to it in this time of depression."

It would be the responsibility of the government and the Canadian National Board of Transport, recommended by the Duff Commission—to maintain the railways as going concerns giving employment, said Mr. Bennett. "Speculators will have to be made. We may as well face that. But it will be a common sense, every one will have to suffer."

Every consideration would be given to the representations, said Mr. Bennett. Seated with the Prime Minister were Hon. Hugh Guthrie, Minister of Justice; Hon. R. J. Manion, Minister of Railways; Hon. Alfred Durnand, Minister of Fisheries; and Hon. E. N. Rhodes, Minister of Finance.

When it was suggested the bonded indebtedness of the Canadian National should be reduced, the Prime Minister said, "the bonds had been guaranteed by the government, and cannot be written down. The interest must be paid if the credit of this country is to be upheld."

Would Limit Exports

What Should Be Used For Feed For Livestock

Saskatoon, Sask.—Canada should limit exports of wheat by converting as much as possible of it into beef, bacon and lard, poultry and eggs, and perhaps even butter and cheese, F. H. Auld, deputy minister of agriculture, suggested at the session of the Saskatchewan Agricultural Societies' Association. The agricultural societies should mould public opinion in this regard.

The possibilities of increased export of bacon should not be considered only with a view to whether bacon production would be profitable but also with a view to the improvement of wheat prices by feeding surplus wheat to hogs and so relieving the pressure on the wheat market.

To Amend Appeal

Montreal, Que.—Permission to add to and amend the notice of appeal filed Dec. 27 was granted to James J. Harpell, publisher, by the court of appeals today. Harpell is appealing a sentence of three months imprisonment imposed on him after conviction on a charge of libelling T. R. Macaulay, president of the Sun Life Assurance Company.

Conciliation Sought

Washington, D.C.—A British naval officer has reported in advice from Nanking, made public by the Chinese legation, to have acted under instructions from London to seek conciliation between Chinese and Japanese troops after the fighting at Shanhai.

U.S. Farmers Fight Taxes

To Protect Property From Loss Through Tax Sales

Chicago.—Farmers of the agrarian states are fighting two of their ancient foes, mortgages and taxes, with a desperate determination this winter, and state legislatures are their battleground.

Their fight is waged with bills of a hundred different designs, but the weapons are aimed at the same target. By one method or another it is intended to protect the farmer from loss of his property through tax sales or mortgage foreclosures.

Nearly every legislature meeting this year has heard the farmers' voice in measures designed to give them respite from tax and interest burdens.

Outside legislative halls, farmers from Iowa to Pennsylvania have given proof of their earnestness, sometimes by forcibly halting tax and mortgage sales. In many states farm groups have voiced their feelings in language which has commanded legislative attention.

Relief sought through the state legislatures is chiefly concerned with reduction of the farmers' "dead" charge from tax with legislation to increase prices sought through the federal government.

Wheat Exports

About 80 Per Cent. Of 1933 Crop Is Now Marketed

Ottawa, Ont.—About 80 per cent of the 1932 wheat crop has been marketed in the prairie provinces, and exports of Canadian wheat and wheat flour for the five months up to the end of December totalled 150,000,000 bushels, as compared with 107,000,000 bushels during the same period in 1931, according to the monthly review of the Dominion Bureau of Statistics.

The review stressed the importance of exports of Canadian wheat to the United Kingdom during the present crop year. According to British trade returns, during the four-month period from October to November, 1932, total imports of wheat into the United Kingdom amounted to 68,000,000 bushels of which 24,000,000 bushels originated in Canada. The bureau estimated that during the corresponding months of 1931 not more than 20 per cent of British imports consisted of Canadian wheat.

The review stressed the importance of exports of Canadian wheat to the United Kingdom during the present crop year. According to British trade returns, during the four-month period from October to November, 1932, total imports of wheat into the United Kingdom amounted to 68,000,000 bushels of which 24,000,000 bushels originated in Canada. The bureau estimated that during the corresponding months of 1931 not more than 20 per cent of British imports consisted of Canadian wheat.

Trying Times For Dairymen

Prices Of Dairy Products Lowest In Past Twenty Years

Saskatoon, Sask.—At a session of the Saskatchewan Dairy Association at the university, P. E. Reed, dairy commissioner for Saskatchewan, drew a picture of the lowest prices during the past 20 years obtaining during 1932 for dairy products.

Mr. Reed said there were trying times for the dairyman, but still there were some bright spots to be noted, such as improvement in the quality of Saskatchewan butter, and the fact that, although only 40 per cent of the creamery output was creameries operated, as compared to 63 the previous years, 278,828 pounds was the average per creamery compared to 267,681 in 1931.

The total value of dairy products in 1932 was \$13,938,000 a decrease of more than \$2,000,000 under the previous year.

The 1932 output of creamery butter 17,806,985 pounds, a decrease of more than a million pounds from the figures of 1931.

Aid For Farmers

Opposes Plan To Put Inexperienced City Men On Farms

Penticton, British Columbia.—Governments should devote more energy to relieving distress of those already on farms and improve economic conditions by that method, rather than increase difficulties by adding over-supply of agricultural commodities by putting inexperienced city men on the land. This was the opinion expressed by R. H. Macdonald, president of the British Columbia Fruit Growers' Association, at the 43rd annual convention.

Insurance Legislation

Winnipeg, Man.—Designed to get around the recent decision of the privy council placing control of insurance companies in the hands of the provinces, legislation enjoining the provinces to legislate with jurisdiction over insurance companies in Manitoba will be brought down by the Manitoba Government at the coming session of the legislature, it was learned here.

Community Life

Need For Development Stressed By Saskatoon Speaker

Saskatoon, Sask.—Emphasizing the need of a vital community life, particularly the cultural and social guidance of young people, in view of the agricultural society should take the lead as a sort of community club, J. G. Rayner, director of agricultural extension at the University of Saskatchewan, gave his report as secretary at the annual convention of the Saskatchewan Agricultural Society Association here. He suggested new fields of endeavour for the societies in a time when, owing to lack of funds, the usual enterprises had to be abandoned.

Mr. Rayner's report pictured the decline in the activities of the agricultural societies, with a total membership reduced from 28,850 in the year 1930 to 5,390 in 1932, but stated that while any report connected with agriculture at this time would contain dismal passages, it had its bright spots also. Good work had been done despite all obstacles, Mr. Rayner declared.

Announce Refusal To Take Pay Reductions

Stand Taken By Railway Workers In England

London, Eng.—Employees of the major railway companies of England announced their refusal to accept wage reductions recommended by Sir Harold Morris, chairman of the National Wages Board.

The definite stand by the employees now leaves the companies with the necessity of carrying on with the former wage scale or the alternative of posting notices instituting the wage cuts. Attempts at compromise have failed.

CONVENTION OF C. C. F. WILL BE HELD IN REGINA

Calgary, Alberta.—First Dominion-wide convention of the newly-organized Co-operative Commonwealth Federation will be held in Regina early in July, with delegates of constituent units from coast to coast attending.

Announcement of the definite selection of the Saskatchewan city as the first convention city was announced by Norman F. Priestly, president of the United Farmers of Alberta and provisional secretary of the C.C.F. An executive meeting in Regina would precede the convention, he said, but the exact dates of the Dominion-wide gathering had not yet been set.

Provincial councils now being organized will be two-fold or three-fold in character, depending on the affiliations within the province. Mr. Priestly cited Ontario as an example, where the provincial council, when completed, probably will be composed of representatives of farmers, labor groups and other citizen groups, as well as the C.C.F. clubs. The same policy was being followed in other provinces, where the councils were being formed. Revisions of the constitution, adopted at the organization convention in Calgary last August, will receive consideration.

POLAND'S RADIO PROTEST

Here we see M. Skirmunt, Polish Ambassador in London, Eng., leaving the Embassy after presenting a protest to the Foreign Office complaining of a use of a British radio station for "political propaganda against a friendly nation."

Here we see M. Skirmunt, Polish Ambassador in London, Eng., leaving the Embassy after presenting a protest to the Foreign Office complaining of a use of a British radio station for "political propaganda against a friendly nation." Poland took exception to some remarks on Poland made during a commentary by the British Broadcasting Corporation preceding a relay of several European stations recently.

Liquor Advertisements

Want Permission To Publish Liquor Ads In Ontario Papers

Toronto, Ont.—Permission for publication of liquor advertisements in newspapers and magazines in Ontario was urged upon Premier G. S. Henry by a delegation of five of the Allied Printing Trades Council, in seeking employment for some 500 members of the council.

It was argued that several American publications that would have been published in Ontario were sent to Montreal for publication because liquor advertisements were used in them.

Anxious To Vote

Man In Ireland Cycled 100 Miles To Cast His Ballot

Dublin, Ireland.—Two centenarians were among the first to cast their vote in Donegal as the Irish Free State went to the polls. In Kesh, a husband, a wife, aged 101 and 99 years, respectively, voted their preferences.

A Galway man cycled 100 miles to cast his ballot, while an enthusiast in Kilmurry walked 40 miles to do his bit for his party.

To Be Deported

Montreal, Que.—Edmond Audard, a naturalized Frenchman who has lived in Canada since 1909, will be deported after serving a sentence of one month's imprisonment for obtaining \$20 by false pretences. He was sentenced by Judge Marie in court of sessions.

TIGER CUB BORN DURING CIRCUS

Mr. Matthes, famous animal trainer, gives young Olympia a feed before officially presenting it to Mr. Bettam Mills for safe keeping, while a young admirer looks on. The tigress cub was born at Olympia, London, England, in India. This was the opinion expressed by one of the circus performers which drew thousands each winter, including members of the Royal Family.

Intellectual Development

Dr. H. H. Ford Scores Any Movement Towards Curbing Opportunity

Vancouver, B.C.—A challenge to those who would curb intellectual development of Canada was voiced by Dr. H. H. Ford, chairman of the National Research Council of Canada, in addressing the Canadian club here.

"The man who would curb the intellectual activities of the country is a traitor to the nation," declared Dr. Ford with emphasis.

"What are your great natural resources without men equipped with the intellectual approach?" he asked. "On the great prairies of Canada the white man produced more in one year than had been produced there in the ages. What are natural resources without the training to use them? Without that intellectual ability they may be a curse to the country which owns them. Scientific discoveries of comparatively recent years have given employment to millions and opened up new activities."

Treasure Hunt

Syndicate Sues Coos Island Venture

Vancouver, B.C.—All members of the Coos Island treasure party have been abandoned on the mainland of Costa Rica, officials of the syndicate announced recently. The evacuation was made necessary through defects developed about the contact boat "Vigilant."

In a statement issued by G. T. Gurney, managing director, and L. Col. J. T. T. director, it was announced the venture would not be abandoned but that after consulting with shareholders it was planned to send another expedition to the island, thoroughly equipped to complete the work carried on during the past 11 months.

Plan Meets With Success

Prepayment Of Taxes Is Working Well In Ontario

Toronto, Ont.—Ontario's citizens, in these so-called days of depression, are willingly laying their money on the line in taxes for the old home town. Survey of 12 cities, in which 11 have put up with tax prepayment plans, shows discount-on-advance-pay system is generally well received and operating successfully.

Among cities covered by the survey, Toronto, Sault Ste. Marie, Galt, Windsor, Ottawa, Kitchener, Stratford, London, St. Catharines, Sarnia and Sudbury have adopted the prepayment scheme.

BRITAIN HAS AGREED TO U.S. DEBT DISCUSSION

London, Eng.—Great Britain, in formally agreeing to Anglo-American debt discussions by a note which Ambassador Sir Ronald Lindsay handed to the U.S. State Department, definitely limited the scope of any decisions which may be taken at Washington to questions relating to the British war debts to the United States.

Great Britain stated that she will be "glad to exchange views with Mr. Roosevelt on other world economic problems in which the two governments are interested," but decision "naturally cannot be reached," before the world monetary and economic conference.

In Whitehall this was interpreted as having a two-fold object. Britain does not desire to be drawn too deeply into any general discussions of world economic problems at Washington. Secondly, there is a desire to safeguard the aims and purposes of the world economic conference of which Prime Minister Ramsay MacDonald was named chairman by the Geneva preparatory commission.

It is expected the world economic conference will assemble in London as soon as possible after the Washington debt discussion has been concluded. British observers expect this to be in May at the earliest.

Washington.—Great Britain accepted President-Elect Franklin D. Roosevelt's terms for a discussion of debt, but did not make a reservation against deciding what questions will be considered by the world economic conference until there is a general meeting of all nations to be represented there.

The British reply was delivered at the state department while a furious debate raged out in the senate which indicated that if there has been any yielding in the congressional opposition to cancellation or revision, it is still of small proportions.

ONLY ONE OF TEN DEPORTEES STILL IN CANADA

Halifax, N.S.—Only one of ten aliens ordered deported as Communists last May remains in custody at immigration detention quarters here. The names of the deportees are Dan Holmes and Stefan Worscey, only John and Benbay (Ivan Sten) were left.

Holmes, whose real name is Dan Chomicki, and Worscey were sent out of the country aboard the liner "Poland" bound for Copenhagen and Gdynia. Holmes is an Austrian and Worscey a native of Poland. The fact that they had gone was not generally known. Lionel A. Ryan, barrister who represented the Canadian Labor Defence League in their intercession, did not learn of it until recently.

Ryan said no appeal to the judicial committee of the Privy Council would be taken from the rulings of three Canadian courts. Refusal of the Minister of Immigration to stay deportation proceedings had made such an appeal impracticable, he said. It was now only an academic question. The ten held here were: Arvo Vuori, editor of the Finnish Daily "Vapaus"; Stanislaw, Ont.; Martin Parker, his secretary; Hans Kist of Berlin; Conrad Ciesinger, Bavarian; John Fries, of Hungary; John Stahler, Montreal; and two others, Frederick Zuercher, Swiss; Benbay and the two who left on the ship January 23.

Stahler was sent to the United States, where he was a naturalized citizen, and Vuori, Parker, Kist, Ciesinger, and Fries were deported last in December to their home countries. Zuercher was deported subsequently. It was understood at the time that Benbay, the lone remaining alien, has made arrangements to be sent to the Soviet Union.

Labor Representation

All Canadian Congress Of Labor Interviews The Premier

Ottawa, Ont.—A sharp indictment of the Trades and Labor Congress of Canada and a request for equal recognition of other labor organizations before the law and in the selection of labor representatives for government bodies and commissions was presented to Premier R. B. Bennett and his cabinet by a delegation from the All-Canadian Congress of Labor.

The Trades and Labor Congress was pictured as a "quasi-political body," deriving its standing wholly from the support of United States-controlled unions and lacking in voluntary support from the workers of Canada. It had no right to pose as or be recognized as the official representative of organized labor in Canada.

In a two-hour interview with the cabinet, the delegation brought forward a score of charges against the rival labor organization.

Premier Bennett thanked the delegation for its representations and promised consideration.

Prize Birds Dead

Brucellosis Attacks Poultry In Alberta Egg-Laying Contest

Lethbridge, Alberta.—Sixty-two birds from the finest poultry flocks in Alberta had died as result of an epidemic which broke out at the Lethbridge experimental farm, where they were entered in an egg-laying contest.

Recognizing the seriousness of the situation, the contest management issued a statement in which it said an epidemic of infectious brucellosis broke out among the birds on Jan. 17.

Took Drastic Measures

Quebec, Que.—Because he cut off his right index finger and lost a small companion under the Workmen's Compensation Act, Joseph Dupuis, St. Adèle De Poth, Quebec, was sentenced to four months imprisonment with hard labor. He was arraigned on a double charge of seeking to obtain money from the Workmen's Compensation Commission under false pretences and of committing perjury.

Safer Than Highway

Coastville, Pa.—For years, Vivian Dipski, 62, a crossing watchman, walked to work on the railroad right-of-way. A union guy, the management ordered him to take a safer course. A few days ago a truck roared down the Lincoln Highway and killed him.
